Dear Resident,

On Monday July 10th, the Town of Crown Point will be switching water sources from the two wells located at the fish hatchery, to the recently rehabilitated well at Pearl Street.

During this switch, any observed or perceived changes in color, smell or taste of your water will be possible, however the water is still safe for consumption and use during this time. The switch will be temporary, with the Town switching back to the two fish hatchery wells by close of business on Friday July 14th.

Should you observe any unexpected or persisting issues please contact Mr. Gary Allen, Crown Point Water and Sewer Superintendent at (518)-597-4350.
